

The content fully complies with the latest curriculum guide from the Education Bureau.

- Each book has 18-23 exercises, sequenced according to mainstream textbooks for easy reference and use.
- Each exercise comes in a clear and systematic structure with 3 sections:

- Level-up questions and public exam questions are included, encompassing advanced questions and the common question types in public exams.
- 🖊 There are 🔭 Useful Tips and 色 Quick Reminder in the exercises, providing skills for solving questions or revisiting concepts learnt in previous years.

Upgrade practice

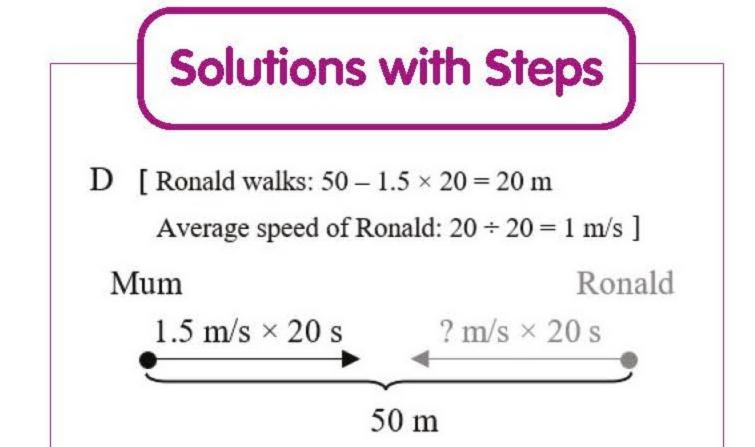

- Cross-topic Exercise is added to strengthen the ability of knowledge integration and application.
- Inquiry and Investigation' in the latest curriculum: Challenging Problems are included to respond to the needs of the new curriculum.

Assessment

- The book includes two assessment tests and a final assessment.
- Concise Revision Notes listing key concepts and formulae are provided.

**Explicit answers** 

The answer key offers three kinds of explanation:

Wrong choice	Reason
A	Mistakenly regard 50 m as the distance walked by Ronald. Therefore, wrongly write the expression as $50 \div 20 = 2.5$ .
В	Mistakenly regard the distance from Mum's speed is the distance walked by Ronald. Therefore, wrongly write the expression as $(1.5 \times 20) \div 20 = 1.5$ .

Common mistake: $\frac{1}{5}$ ×	
•	Neglect that the unit of the answer is minutes. To get the correct answer, we should $\times$ 60 to convert hours to minutes.
